Fix hood. Front zipper with snap buttons. Trousers with open pockets and elastic waist. 100% PU on knitted polyester. 0.40 mm

| There are many and varied tasks that can be carried out in a garden, orchard, or terrace: starting with the DESIGN and renovation of the garden, through planting and caring for the vegetation, and ending with a moment of relaxation, enjoying our hobby, or preparing a good barbecue. Given the diversity of tasks to be performed, the danger and risks associated with each of them also vary.  The vast majority of gardening applications do not involve extreme or serious risks. These tasks require extensive use of the hands and can cause lacerations, bruises, cuts, bumps, and entrapment.  However, other tasks significantly increase the level of danger: applying phytosanitary products or handling cutting tools such as chainsaws require the use of appropriate PPE and taking appropriate safety measures.  The garden is also a place to enjoy moments of fun and relaxation.  | There are many and varied tasks that can be carried out in a garden, orchard, or terrace: starting with the DESIGN and renovation of the garden, through planting and caring for the vegetation, and ending with amoment of relaxation, enjoying our hobby, or preparing a good barbecue.
